

## Rukhi Seedling Greenhouse

Sale of assets without any financial  
debt through an auction

Location: Zugdidi district, Village Rukhi

“Sakartvelo Satburebis Kompania” Ltd

Identification code - 404908007

Cadastral code - 431044239

The greenhouse (seedling plant) is located on 1.5 hectares of non-agricultural land in Rukhi village of Zugdidi district. The greenhouse itself is 0.5 hectares. Office, storage and other supportive buildings occupy 0.12 hectares. The greenhouse construction was provided by Turkish company “Guney Seracilik”. The construction is accommodated for local climate conditions. At full capacity the greenhouse can produce from 2.5 to 3 million different vegetable culture seedlings for open and covered soils.

### The seedling plant is equipped with state-of-the-art technologies:

- ◆ Climate control automatic management system
- ◆ Ozone filtration system
- ◆ Seed stirring incubator, which is intended for stirring 360,000 seeds simultaneously
- ◆ Irrigation and feeding computer-based management system
- ◆ Sun protection and space dividing system

The seedling plant's walls are made of cellular polycarbonate, which makes the construction more resistant to the environmental factors (for example: strong wind, low temperatures).

### The production plant's profile must be maintained for five (5) years
