

"Gori Sasatbure Meurneoba" Ltd

Agricultural Projects'
Management Agency

Gori Greenhouse

Sale of assets without any financial
debt through an auction

Location: Gori district, Village Berbuki

"Gori Sasatbure Meurneoba" Ltd

Identification code - 406068589

Cadastral code - 665422398

The greenhouse is located on a 4.8 hectares land plot (of which 3.9 hectares are agricultural and 0.9 hectares non-agricultural land). The modern type hydroponic greenhouse occupies 3.3 hectares. The greenhouse is produced by the Spanish company TECNOPONIENTE and is equipped with state-of-the-art technologies, specifically:

- ◆ Climate control system with automatic management and ventilation regulator
- ◆ Hot water heating system that works on natural gas, diesel fuel and coal
- ◆ Irrigation and feeding computer-based management system
- ◆ CO2 supply system
- ◆ Sun protection and space dividing system

The green house construction can resist a wind of 100km/hour. The plastic cover can resist snow pressure of 100 kg/sq.m. The construction arcs and heating system ensures the fast melting of snow, the heating system ensures the maintaining of optimal temperature within the green-house- even in case of 15 degrees Celsius.

The production plant's profile must be maintained for five (5) years
